

Jr. Programmer Analyst

Description

Provide Windows-based hardware, software, database and technical support for a fast-growing national financial consulting firm. Support of Windows VB.NET, .NET Framework 3.5 and Classic ASP software systems and SQL Server 2005.

Strong problem solving skills, understanding of Microsoft SQL stored procedures and functions, VB.NET, .NET Framework 3.5, and good work ethic is paramount for success.

Ideal candidates will thrive in a fast paced entrepreneurial environment. Strong organizational skills will provide the platform for managing multiple tasks, prioritizing work and meeting multiple client deadlines. They will be resourceful in acquiring both information and the knowledge required to be successful.

Requirements

- VB.NET and ASP.NET using Visual Studio 2005 or higher
- Ability to read, write and debug SQL Server Stored Procedures
- 1-2 years of information technology experience
- Strong analytical skills
- Strong attention to detail
- Effective verbal and written communication skills
- Ability to organize, prioritize and manage multiple tasks
- High work standards

Preferred

- Classic ASP, VBScript and JavaScript
- AS in Computer Science, CIS, or MIS

Notes

- SQL and VB.NET exam required
- Extensive interview process
- Drug and background check are required
